

Quality of Higher Education

- Meet Mentimeter!
- What is Quality
- Who are the experts in learning?
- Who are the experts in teaching?

Warmup - What stakeholder of Higher Education do you represent?

What Quality means to you?

Quality

You can never achieve the "expected quality" and step back, expecting it will last for long. It is a constant process.

Cooperation instead of competition is the basis for the development of higher education institutions and students.

High quality higher education is of utmost importance for students, institutions and society. An education of high quality provides the right tools for students to meet future challenges. A high quality higher education system is characterised by removing all obstacles to access, facilitating progress and completion, implementing a student-centred approach to learning and teaching, and fairly assessing students. This system must also be braced by adequate student support services; ensuring links between learning, teaching and research activities; individual, social and civic training for responsible and active citizens; mobility opportunities; academic freedom; interdisciplinary, multi-disciplinary and cross-border programs; and where students are considered full members of the academic community and competent, constructive partners.

Who are the experts in teaching?

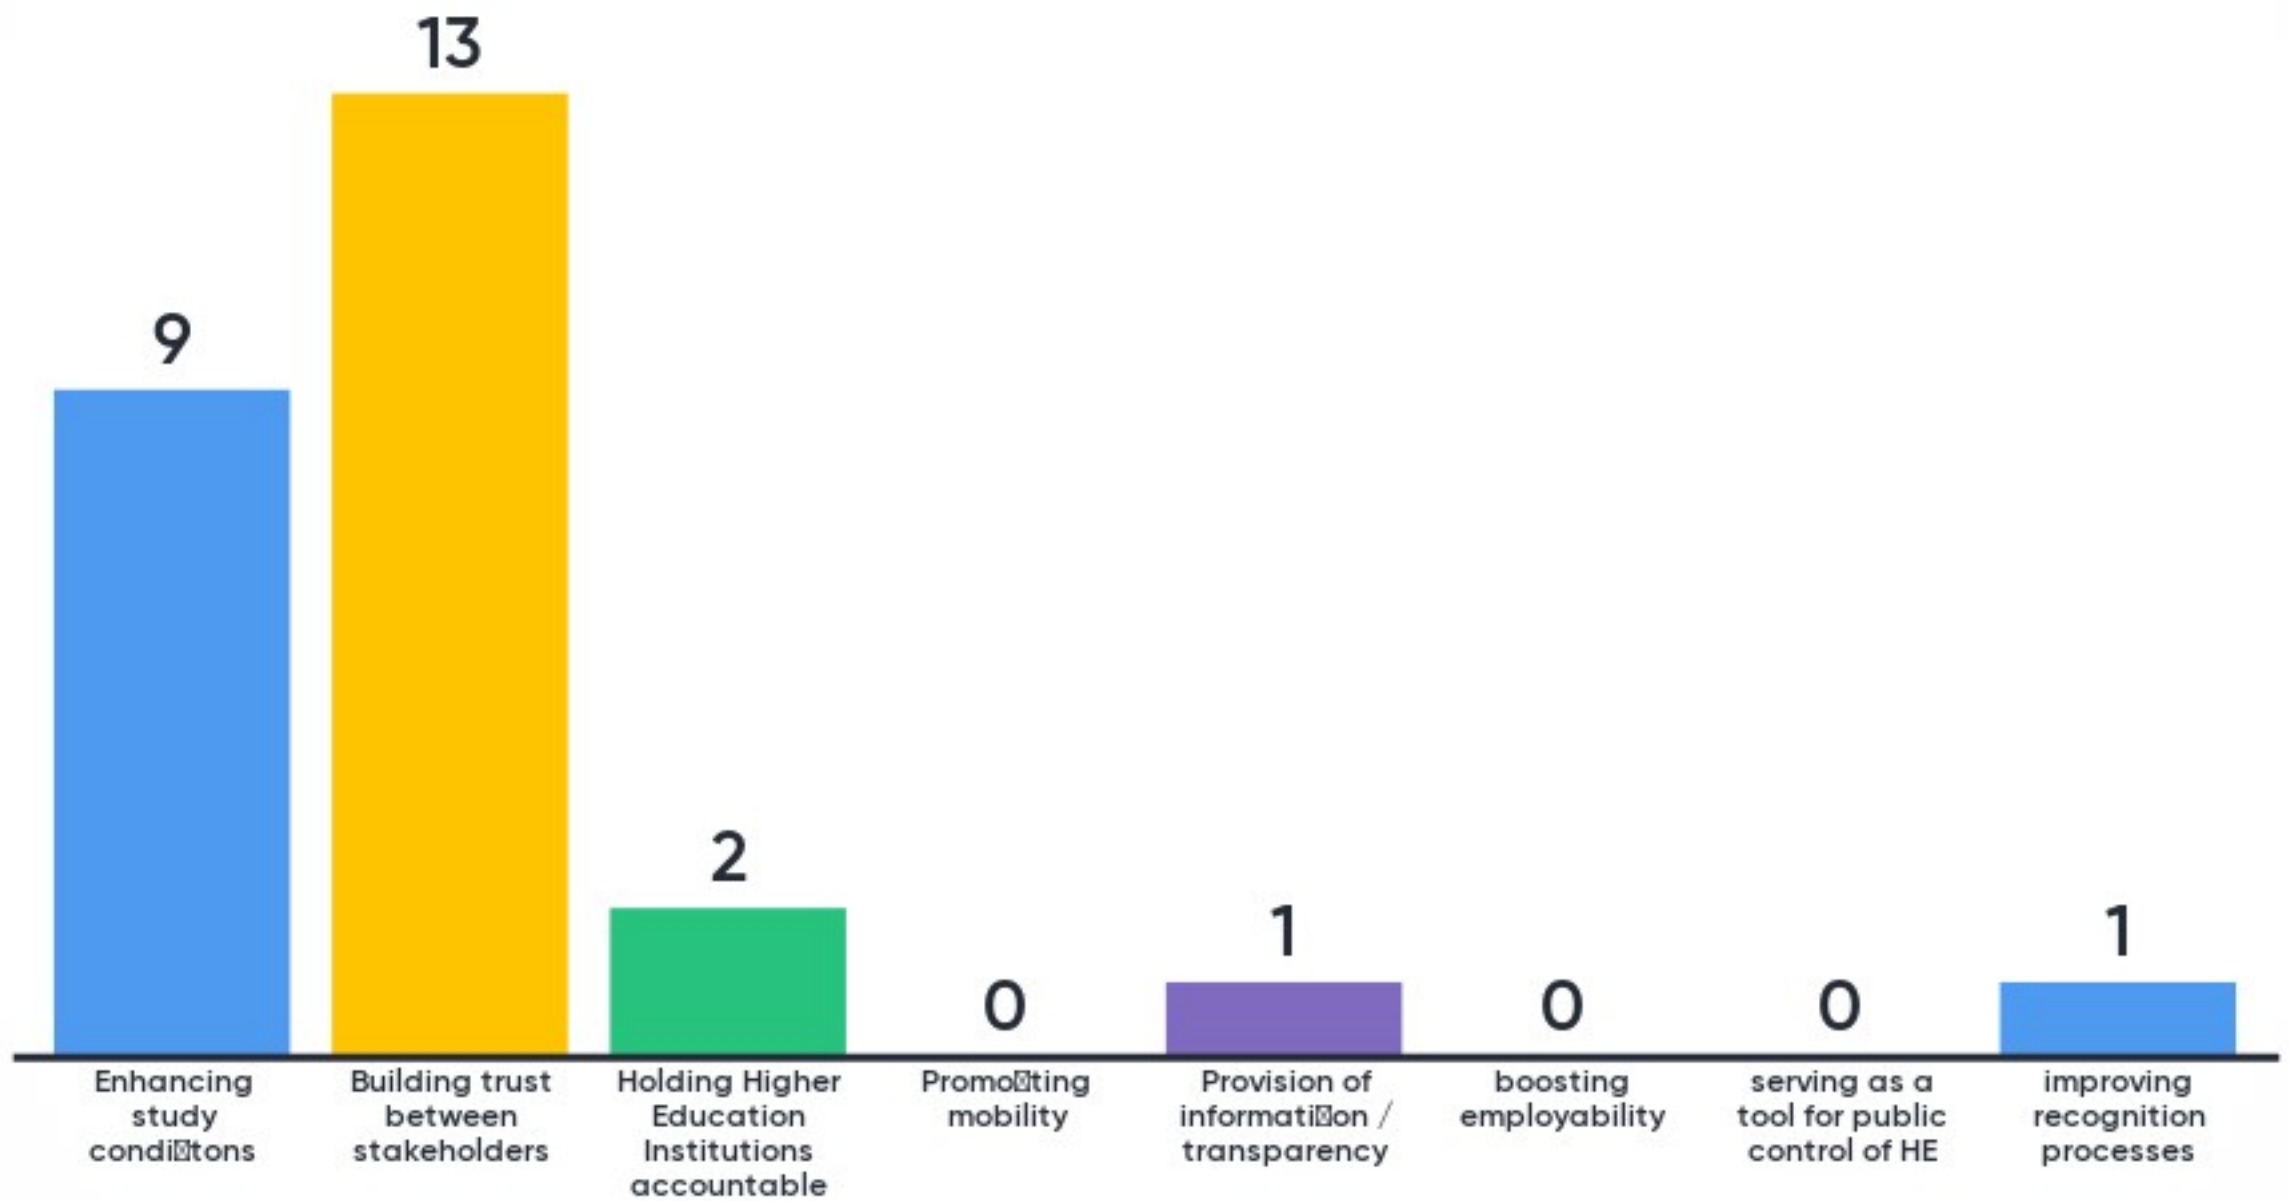

Who are the experts in learning?

Does previous answers look similar?

At least those should!

What is the purpose of Quality Assurance

Time for a work in groups

You have been assigned to a certain group while entering the meeting,
lets group up now and try to answer in the group a few questions.
Think as stakeholder!
